- Certified in MongoDB (MongoDB Academy).
- ChatGpt for Everyone from Guvi
- AI tools from Be10X

PROFESSIONAL EXPERIENCE

Frontend Development Intern – Balkans IT Solutions (Dec 2024 - May- 2025)

I worked as a Frontend Developer Trainee where I designed web applications and mobile app UI screens using Figma. I supported the team in improving layouts and creating clean, user-friendly interfaces. I built basic responsive designs using HTML and CSS and collaborated with developers to ensure proper implementation. This experience helped me understand usability, teamwork, and practical UI/UX design workflow.

PROJECTS

College Time – UX Case Study

Designed a user-friendly and clean mobile app interface for students using Figma. Conducted basic user research and structured the app with clear sections such as College Events, notifications, Club activities and profile to ensure easy navigation and better user experience.

Coffee Shop Website Design

Designed a modern and clean website layout for a coffee shop using Figma. Structured the homepage with proper sections such as hero banner, product display, and contact information to ensure a user-friendly experience.

Farmer-Consumer App Design

Designed UI screens for a farmer-consumer mobile app with simple navigation and a clean, user-friendly interface for better accessibility and usability.
